## **Dynasty Gold Expands Mineralization into a New Zone at Thundercloud and Exhibiting at VRIC 2026, Vancouver (January 25–26), Booth 1029**

**VANCOUVER, British Columbia**, January 22, 2026 -- Dynasty Gold Corp. (TSX.V: DYG) (FSE: D5G1) (OTC: DGDCF) ("Dynasty" or the "Company") is pleased to announce that it will be exhibiting at the Vancouver Resource Investment Conference ("VRIC") on January 25-26, 2026, at Booth 1029 to showcase its new discovery at its 100%-owned Thundercloud property in NW Ontario.

The management will discuss recent drill results at the new South-Pelham Zone. All 3 widely spaced step-out holes intersected gold mineralization within the first 50m of surface, 1.5 km south of the mineral-rich Pelham Zone. The results have opened up a 2.5 km mineralized north-south trend and can potentially lead to expanding the historical NI 43-101 mineral resource in the Pelham Zone into a large-scale deposit. Dynasty's goal is to develop these two mineralized zones into one large gold system for multi-million ounces resource expansion. The company also plans to drill additional targets in the high-grade Pelham Zone to convert resource into minable reserve in \$4,800/oz gold environment.

### **About Dynasty Gold Corp.**

Dynasty Gold Corp. is a Canadian mineral exploration company currently focused on gold exploration in North America. Its 100%-owned Thundercloud property is situated within the Archean Manitou-Stormy Lakes Greenstone Belt, in northwestern Ontario. The Company is currently drilling to expand the NI 43-101 gold resource. A NI 43-101 Resource Estimate Report can be found on the Company's and SEDAR websites. The 100% owned Golden Repeat gold project in the Midas gold camp in Elko County, Nevada shares similar geological features as the Midas Gold mine and is surrounded by a number of large-scale operating mines. For more information, please visit the Company's website at [www.dynastygoldcorp.com](http://www.dynastygoldcorp.com).
