Dynasty Gold Selected for PDAC 2026 Gold Forum Presentation and Exhibits at PDAC Booth 2832, March 1-4

VANCOUVER, British Columbia, February 24, 2026 -- Dynasty Gold Corp. (TSX.V: DYG) (FSE: D5G1) (OTC: DGDCF) ("Dynasty" or the "Company") is delighted that its 100%-owned Thundercloud gold project has been selected for the second time by the PDAC Selection Committee to present at the Gold Forum on March 4, at 10:47 AM during the PDAC conference. The project is located 47 km southeast of Dryden City, in northwest Ontario, in a turnkey mining location with access to power, rail, and the Trans Canada Highway.

Since its maiden drilling at the Pelham Zone in 2022, the Pelham historical ~200,000 oz NI 43-101 open-pit resource has been significantly expanded by intercepts such as 72.2 g/t over 6.5m, 65.2 g/t over 3m, and 10.4 g/t over 6m, as well as lower-grade broader intercepts of 1.2 g/t over 130.5m. The new mineralization discovery during drilling in 2025 in the South-Pelham Zone opened up a 2.5 km mineralized north-south corridor between the Pelham Zone and Pelham-South, confirming the mineral-rich grounds at Thundercloud and extending the potential for Pelham Resource expansion.

The management will discuss the 2025 new discovery drill results and their implications, as well as the 2026 drill plans, at Booth 2832. With gold at ~\$5,000 oz, it is a high and pivotal time to showcase a high-grade gold project. We look forward to seeing everyone at the conference.
